A CAREER PROFILE

During my college years, I worked as a student assistant in the IT department of my university. This role helped me learn a lot about various IT systems and how they function. I gained experience in working with network formation and management, which gave me valuable insights into the practical aspects of IT. In the summer after my second year, I completed an internship in the ERP department of a manufacturing company. This gave me the opportunity to understand the entire process of the company's operations and how the information center of the factory works. I was exposed to a variety of tasks, including data analysis, system maintenance, and user support. Through my experiences in both the university IT department and the manufacturing company, I have developed a strong passion for IT and its application in the real world. I am confident that my knowledge and skills will enable me to contribute meaningfully to any organization that values technology and innovation.
